Beck, U. and E. Beck-Gernsheim (2002). Individualization: Institutional Individualism and its Social and Political Consequences. London, SAGE. The book deals with post-modern society re "freedom" -> necessity to define own life, w few of the soc, cultural or secure financial institutions of the past as support. a chapter on genetic testing discusses the growing imperative to act "responsibly" re healthcare, life style and reproductive decisions. a v interesting book and chapter if one wants a historical/philosophical in-depth discussion of these issues
