Resources for Clergy in Human Genetic Problems: Health 1988

ASHG/ACMG statement: Genetic testing in adoption: American Society of Human Genetics Social Issues Committee and American College of Medical Genetics Social, Ethical, and Legal Issues Committee

The book deals with post-modern society re "freedom" -> necessity to define own life, w few of the soc, cultural or secure financial institutions of the past as support. a chapter on genetic testing discusses the growing imperative to act "responsibly" re healthcare, life style and reproductive decisions. a v interesting book and chapter if one wants a historical/philosophical in-depth discussion of these issues
